

i love the traffic/weather channels on xm radio; i like to be able to get up to the minute traffic when i need it, not when the radio stations decide to give it to me;

more than once i've been able to use xm traffic/weather here in the pittsburgh area to find avoid accidents and congestion and once, when we least expected stopped traffic, to find out why!

this is a great service and one very much appreciated by a listener who is on the road quite a bit!
